## DISBECKER'S DIRT.

The Street Cleaning Department's Profits in the Garbage Trade.

WHO BUYS ROTTENNESS?

"Deadshot's" Call for a Mass Meeting.

The Board of Aldermen Alive to the Stench.

The traffic in street flith, garbage, &c., which has formed a most profitable speculation for the Department of Police since the creation of the much more extensive affair than the public are aware, and yields profits that would satisfy operators in a more ambitious class of mercantile enterprises. Quotations vary during the year. the seasons affecting the trade to a large extent. The various grades of fith suitable for spring or fall uses, as the contract rs need filling, are presented in the Police Department garbage market with the same regularity as first class milliners offer their tempting wares to our fair ladies. Spring goods are largely made ap for this market from the wretched slums of the city, from which the winter's filth is thawed out and carted to the river side dumps. This is somposed of household rubbish, bones, rags and bedding, old matting and a considerable per-centage of ashes. As the spring advances the quantity of animal and vegetable matter in-treases and the ashes decrease, until at midsummerand during the early fall, when the temperature is highest and the evil consequences of using this stuff are greatest, all the garbage sold by the Department of Police is of the worst and most of-lensive caaracter. In view of this fact, it will be interesting to examine the official accounts of the Police Department, which show when this vite mixture is sold to whom, and in what quantity. After a careful examination of the Police Department books the writer is enabled to present a detailed statement of the sales of manure, ashes, rarbage, &c., from September, 1872, to May 1, 1875. USES OF THE MANUES SOLD. The manure sold, as above stated, is formed of the street sweepings and gutter fith, and is said to be used for agricultural purposes; but there is no syidence that it has not been used, like the "garbage" filling, for general real estate purposes as well. Perhaps Captain Thorne, who was an extensive purchaser, can tell. The explanation of the Superintendent of Street Cleaning is in order:—
"The Treasurer's account for the sale of 'ashea, garbage,' &c., is kept distinct from the manure transactions." Why, it is rather dimentito say, nniess, indeed, that the manure smelled worse than the garbage and deserved to be classed on that account. We find the sales of the ashes, garbage, &c., to be as follows:— Fear. Honth. Amount. By Whom Paid.

LET PUNISHMENT BE METED OUT TO THE OFFEND--CALL AN INDIGNATION MEETING AND LET THE WHOLE TRUTH BE TOLD. TO THE EDITOR OF THE HERALD :-

I have been reading with deep and pleasurable interest your splendid exposé of the McQuaid Milis and Disbecker operations on the Harlem flats and elsewhere. What occurs to me after perusing all you have published is this: How is it, in view of the outrageous course of these people in spreading the seeds of disease and death over a large area of the city, that no steps have been taken to punish them? it is simply puerlie to rest satisfied on the tnem? It is simply puerlie to rest satisfied on the mere promining atom of a paper direction to cease dumping the dith and garbage. What ought to be done is to take steps for the punishment of the whole crowd. Let Disbecker and Matsell be removed, Let McQuaid and the others be prosecuted to recover back the money wronginily paid them and then let them be compelled to remove the view and then let them be compelled to remove the view filling they have dumped in the very seart of the city. Final's the way to deal with them, and if the inhabitants of Yorkville and Hariem are not uterly dead to their interests they will get up an indignation meeting and adopt resolutions calling upon the Mayor to remove Poince Commissioners Matsell and Dispecker, who are either inefficient or climinal, and calling upon the Grand Jury to Indict McQuaid. Ambrose & Co. for creating a stupendors aussance.

This is true but when compared with the foul exhalations which greet the nose late at night and early in the morning it is tracing and tonicagreeable, in lact. At noonday it has the goodness to be stench in a most decided form, but late at night, when the dew is lailing, it pervades the atmosphere as a warm, soit, hauseating smell-terrible in its sickening effect. I have seen a conductor on a late car on the Inird avenue route grow violeftly sick at the stomach when passing through the stench-tricked district. I myself have been fast asleep and have slept while noisy young men sang songs, but when i reached the swamps the noisome stench made it impussible for me to the fightly in the house being preferable to the frightly smell of festering garbare. In the early morning, when the sun dras strikes the swamp, on which all the fitth you have so truthfully described is deposited, one cannot see from acroes the avenue, so dense is the roy which with deadly unisance, rises, and if there be no wind to bear it off, there it hangs, sluggish and threatening. Occasionally, if the day be damp or logge, the cloud nangs over the marsh all day. On such occasions there is no smell whatever—that is, no smell as long as the atmosphere is surcharged with moisture. Its weight serves to keep the gases down. But on the succeeding day, if the sun comes our strong, the accumulated strength of two days' smell comes out to sicken us.

Already the people in the neighborhood are beginning to suffer in health from the terrible siench, and doctors look forward to a busy and profitable summer.

Why would it not be well (if the Health Board refuses to act in fhe matter) to ap, out a committee of citizens to devise some means of preventing further dumpings! Let them have men to prevent the work from continuing, and thus protect the lives of themselves and their families.

P. S.—To-night the smell is simply horrible. For Heaven's sake don't iet up on these garbage fillers.

"KEEP UP THE FIGHT."

NEW YORK, May 24, 1875. TO THE EDITOR OF THE HERALD:-I am glad to see the HERALD undertakes to abate the intolerable nulsance the people of Harlem are suffering from in the fliling in of the Harlem flats. I am particular y glad the HERALD has taken bold of this matter, as the afflicted of this section of the city have an advocate that will thunder our indignation so loudly into the ears of those in authority that proper measures will be at once taken for our relief.

We are relving on the Herald as a friend in need. Keep up the fight.

THE FLOWER CHARITY.

The ladies who last year devoted so much time and labor to the charitable work of distributing flowers and fruit to the sick poor in hospitals and in their homes have already begun this year the same landable services. In the thought itself of cheering the weary hours of the sick and helpless by means of the ireshness and sweetness of flovers and fruit at this season there is a tender sympathy which is appealing, and no doubt those who can afford to assist the ladies naving this sympathy which is appealing, and no doubt those who can afford to assist the ladies having this charity in their care will give cheerful aid during the summer months. Last summer was the firm season of the charity, and 25,277 bouquets and plants were then sent out to 51 hospitals and 725 private cases. The ladies earnestly appeal to their sisters in the country towns to send at least one baske; of flowers from each town every week during the summer. It is expected that the express companies will bring the purcels free of charge to the address of the New York Plower Charity, No. 239 Fourin avenue.

At the Children's Aid Society, in Rivington street, nowers are also distributed to the children to be taken nome by them to their families and to be placed in the rooms of sick people in the neighborhood. So far this season, however, the supplies sent in have not been very pleatiful, but it is thought that from this week forward the charitable people wil begin to make donations with more spirit. Yesterday morning a limited supply was disposed of, but in this boor section of the city, where flowers are seldom seen in tenement houses and where sickness prevails to so great an extent, contributions cannot be too many.

He was given assurances by two members of the was given assurances by two members of the Board that the necessary force would be supplied at the next meeting of the Board. The Commissioners of Charities claim that frequent raids are made across the East River at night by discharged convicts, who ste al anything that they can get their hands upon. On Wednesday morning, about hall-past two o'clock, the gatekeeper of the Lunatic Asvium was called from his bed by two armed highwaymen, who had landed from the New York side. When he presented himself they put revolvers to his head, robbed him of all the money he had and, neating a retreat to their boat, made good their escape. Mr. Brennan states that it is their intention to secure four police officers as a night pairol on the island to deleat these raids.
